

# Music By The Lake's Environmental Program

Dear Music By The Lake Families,

Camp is not only a place to make friends, have fun and learn music. There are so many life lessons a camper can learn which will benefit them throughout their lives. Also, as camp directors we can set examples that will encourage campers to do the right thing and make good decisions as they grow and mature. In this regard, we are proud to introduce a new initiative that will hopefully achieve some of the above and make a difference in helping the environment. Namely, Music By The Lake has partnered with **LivClean Carbon Offset Solutions** and has made a commitment to support various emission-reducing projects around the globe to help fight climate change. Although these projects are located in different countries around the world, we all live together on the same planet and climate change impacts all of us.

*The emission-reducing carbon offset projects we will support include:*

Project Name	Description	Country
Wind Power Project	On-grid renewable energy	China
Coal Mine Methane Destruction	Destruction of harmful methane	Germany
Agricultural Waste Cogeneration	Agricultural waste fuel switch	India

NOTE: All projects are third party verified to meet the rigorous international reporting requirements of the Voluntary Carbon Standard. More details on each project are available online at [www.livclean.ca](http://www.livclean.ca).

As part of the program we have begun an ECO-Fund whereby a voluntary contribution will be added to each camper's registration fee that will help support us in reaching our environmental goals and eco-initiatives. The ECO-Fund contribution will be \$10.00 for each camper. The funds collected will go towards the purchase of carbon offsets from the emission-reducing projects listed above.

Although we believe this is the right decision and right time to do our part in helping the environment, this initiative is completely voluntary. If you want to be a part of this initiative simply fill out the form below and return it to our Toronto office\*. We do hope you will join our ECO-Fund and together we will make a positive difference in global climate change.

Typically, a company that partners with LivClean receives a kickback of approximately 15% of fees collected to use for their own initiatives or other projects. Music By The Lake has opted out of this kickback so that 100% of all fees collected will go towards LivClean and the targeted projects around the world. At the same time, we have committed to reducing our own carbon emissions and becoming carbon neutral by as early as next summer. We will work together with LivClean to achieve this goal.

We thank you in advance for your cooperation and support of this innovative and important initiative as well as the opportunity to set a great example for our children and make a positive difference in the world.

Sincerely,

Bruce, Pete, Paul and Janice

**JOIN THE MBTL ECO TEAM!** If you do wish to participate in the Music By The Lake ECO-Fund, please complete the form below and return it to our Toronto office. A \$10.00 charge will be applied to your camp fees.
